特点/特性/ 功能描述	<p>100S 匹马棉意味着纱线本身的高档，这种纱使用超长棉纤维，纱线具有少棉结、少毛羽、弹性好和强韧的特征。</p> <p>这种超细纱线以高密度进行编织，每平方英寸中有更多的纱线。这增加了面料的紧密程度和强度。而交织一定比例的氨纶能够让面料具有良好的弹性和拉伸恢复能力。</p> <p>坯布在经过丝光工艺后由于纱线膨胀，组织更加的紧密。丝光清除杂质，布面干净整洁，染色纤维吃色更深，色牢度更好。</p> <p>这款面料布面细腻光洁，触感丝滑软糯，亲肤透气不闷肤。</p> <p>面料自带四面高弹，拉伸回弹好，穿着无束缚，同时抗皱耐磨、不易变形，耐洗耐穿，质感高级。</p>	<p>100S Supima cotton signifies the high quality of the yarn itself. This yarn uses extra-long cotton fibers, characterized by fewer knots, less fuzz, excellent elasticity, and strength.</p> <p>This ultra-fine yarn is knitted at a high density, with more yarn per square inch. This increases the fabric's tightness and strength. The addition of a certain proportion of spandex gives the fabric excellent elasticity and stretch recovery.</p> <p>After mercerizing, the yarn expands, resulting in a tighter weave. Mercerizing removes impurities, leaving the fabric clean and neat, allowing the dyed fibers to absorb colors more deeply and achieving better colorfastness.</p> <p>This fabric has a delicate and smooth surface, a silky and soft touch, and is skin-friendly, breathable, and non-suffocating.</p> <p>It features four-way stretch, excellent stretch recovery, and a comfortable, unrestricted fit. It is also wrinkle-resistant, abrasion-resistant, and durable, with a high-quality feel.</p>
