Exhibition Center (Futian), China

## Future Horizons Forum Sponsorship Packages

## Future Horizons Forum (9 June 2026)

- As Shenzhen increasingly positions itself at the leading edge of fashion technology, **Intertextile Shenzhen Apparel Fabrics 2026** will be held under the theme of textile innovation.
- Taking place on 9 June, a dedicated forum – **Future Horizons** – will unveil innovations that are redefining the industry landscape, providing garment manufacturers, textile suppliers, and designers with valuable industry insights that drive future growth.
- Join our speaker line-up! Get noticed by buyers and industry leaders: showcase innovations in sustainability, circular systems, advanced materials, performance breakthroughs and AI solutions.

# The next wave of textile innovation

This session explores the emerging wave of textile innovations reshaping the fashion and textile sectors.

It aims to showcase advances in new materials and technologies, unveil innovations that are redefining the industry landscape, and highlight opportunities for garment manufacturers, suppliers, and designers to capture the next phase of textile innovation.

# Shaping a sustainable textile future

In recent years, the textile industry has been under increasing pressure to adopt more sustainable practices.

This session brings together experts to discuss approaches for driving sustainability across the industry, and to explore collaborative opportunities for shaping a more resilient and sustainable textile future.

# Unlocking the applications of AI in the fashion & textile industry

Artificial Intelligence (AI) is transforming the fashion and textile sector by driving innovation, efficiency, and sustainability across the value chain. From design to production and retail, AI tools are enabling data-driven creativity and intelligent operations.

This session will focus on AI technologies and their diverse applications, exploring their profound impact on the industry's future development.
